AUTHOR INDEX TO VOLUME 24

Assanis, Y., 57
Austin, J. D., 107

Blosch, E., 415

Carey, G. F., 181
Chai, J. C., 373
Chait, A., 279
Chen, X., 301
Choudhury, D., 391
Comini, G., 243

Dandekar, H. W., 1
Darwish, M. S., 353
Degreve, J., 1
Derby, J. J., 431

Emery, A. F., 209

Henkes, R. A. W. M., 191
Hlavacek, V., 1

Jaluria, Y., 77
Janssen, R. J. A., 191

Kelkar, K. M., 391
Kuppurao, S., 431

Lee, H. S., 373
Liu, C.-H., 127
Lobo, M., 209

Mahallati, A., 315, 337
Manzan, M., 243
Militzer, J., 315, 337

Naraghi, M. H. N., 475
Nelson, D. J., 263
Nichols, III, A. L., 489

Patankar, S. V., 373
Pulko, S. H., 107

Reinhardt, H.-J., 455
Runnels, S. R., 181

Saro, O., 243
Sha, D., 301
Shyy, W., 31, 415
Smith, R., 415
Sun, Y., 315
Swaminathan, C. R., 161

Tamamidis, P., 57
Tamma, K. K., 301
Thakur, S., 31
Tsai, S.-C., 475

Vanka, S. P., 143
Vick, B., 263
Viswanath, R., 77
Voller, V. R., 161

Wang, M., 143
Wang, J. J., 229
Westerberg, K. W., 489

Yang, N., 315
Yao, M., 279
Yen, R.-H., 127

SUBJECT INDEX TO VOLUME 24

Accumulation term, 9
Adaptive mesh, 3

BEM for freezing and melting problems, 263
Bifurcating natural convection, 191
Boundary conditions, 15
Boundary treatments, control volumes, 40
Boundary conditions, 20
Boundary-dispatch method, 480

Choice of time step, 16
Collective terms, 12
Computation using boundary-fitted coordinates, 391
Control volume, 6
Convections schemes, 33
Corrector step, 132
Curvilinear orthogonal meshes in TLM, 107

Darcy's law, 20
Diffusive terms, 9
Discontinuous thermal conductivity, treatment of, 161
Discrete maximum principle, 211
DMP in finite-element thermal analysis, 209
DMP for finite-element operators, 213

Exodus, 475

False scattering, 373, 377
Finite analytic method for 3-D equations, 315
Finite element for radiant heat transfer, 431
Finite-element simulation of phase change, 181
Finite-element modeling, a physical approach, 243
Finite-volume formulation, 6, 31
Fixed-bed model, 229

Galerkin finite-element method, 436
Gebhart's method, 435
Geometric conservation law, 7

Heat capacity method for phase-change problems, 279

Initial conditions, 20

Kirchhoff approximation, 164

Mass conservation in pressure-based algorithms, 415
Melting and solidifications, solution methodologies for, 77
Monte Carlo for conductive heat transfer, 475
Moving adaptive meshes, 3

New high-resolution scheme, 353
New virtual-pulse time integral methodology, 301
Newton-Raphson iterative method, 438
Nodal heat transfer rates, 245
Normalized variable formulation, 357
Numerical treatment of outflow boundaries, 425

Parallel considerations, 23
Parallel ADI for high-order solution, 143
Pin fin problem, 215
PISO, 131

QUICK, 39

Ray effect, 373, 376
Reaction rate expression, 20

Semi-Implicit Method for Pressure-Linked Equations (SIMPLE), 415
Sequential methods, analysis of, 455
SIMPLE algorithm, 131
SIMPLEC algorithm, 131
Simulation of reactive flows, 3
Source term, treatment of, 14
Swartz-Wendroff approximation, 437

Thermal transport code, modification of a, 489
Three dimensional flow calculations, 57
Three-dimensional cavity flow, 337

Vector considerations, 23
